Vision for Health

A nation working together for better health

Mission of Ministry of Health

The mission of the Ministry of Health is to lead and work in partnership:

- i. to facilitate and support the people to:
 - attain fully their potential in health
 - appreciate health as a valuable asset
 - take individual responsibility and positive action for their health
- ii. to ensure a high quality health system, that is:
 - customer centred
 - equitable
 - affordable
 - efficient
 - technologically appropriate
 - environmentally adaptable
 - innovative
- iii. with emphasis on:
- professionalism, caring and teamwork
 value
- respect for human dignity
- community participation

Thrust Four of 9MP : To Improve The Standard And Sustainability of Quality of Life

ACHIEVING BETTER HEALTH

Prospects, 2006 - 2010

Health is an important asset in the development of human capital. During the Ninth Malaysia Plan period, while the Government will continue to provide facilities and implement programmes to improve the health status of the population, greater individual responsibility is crucial for achieving better health. Towards this end, efforts will be undertaken to promote lifelong wellness as a proactive approach to maintain health, reduce the disease burden and harness resources available for the optimum benefit of the population. Emphasis will also be given to the consolidation and integration of services to further improve efficiency, quality, accessibility and equity in health care delivery. Thus, health sector development will be guided by the following strategies: -

- Preventing and reducing the disease burden to further improve the health status;
- Enhancing the health care delivery system to increase accessibility to quality care;
- Optimizing resources through consolidation and integration;
- Enhancing research and development to support evidence-based decision-making;
- Managing health-related crisis and disasters effectively;
- Enhancing human resources development; and
- Strengthening health information and management systems.

Population and Vital Statistics

Land Area (sq.km)*	329,960
Total Population	27,728,700
Population Density (per sq.km)	84
Population By Age Group	
 Below 15 years 	8,876,200
 15 - 64 years 	17,620,200
65 years & above	1,232,300
